

Safety Assessment and Risk Management Package

AUGUST 20, 2014

Acknowledgments

The Redwood Safety Assessment and Risk Management Package was developed by Beth Jordan, Adobe Consulting Services building on prior joint development work with Deborah Sinclair, MSW, RSW in collaboration with The Redwood staff and benefits from the collective wisdom of hundreds of front-line workers, researchers, criminal/legal service providers, health professionals and most importantly women directly affected by violence against women and children. The package borrows from, is inspired by and builds upon the work of several individuals and organizations working in and across the field of women's anti-violence services. The communication, design and layout for ***The Redwood Safety Assessment and Risk Management Package*** was done by Marsha Clarke and Josh Emberlin.

It is understood that the *Safety Assessment and Risk Management Package* is a living document that will continue to evolve, as does the work to end violence against women in all its forms. The need for this package was born out of tragedy, and galvanizes our organization into action, empowering women who are currently experiencing or who have experienced violence to assess their own safety and manage the social, structural and abuser-generated risks they may face.
